AIROS Dance Theatre

Performance “Alkis”

Sound Technical Rider
2021

We bring our laptop and an external sound card to play the soundtrack

Sound equipment that should be provided by the event organizers:

PA & monitoring system (*for dancers*) consisting of:

- 4 – 6 x subwoofers (15” – 18” woofers inside with integrated or separate amplifiers of sufficient power);
- 4 – 6 x hi/mid speakers (10” – 12” loudspeakers inside with integrated or separate amplifiers of sufficient power) provided with height-adjustable stands.

Wireless headphone system (*for performance visitors in transparent cylinders*) consisting of:

- at least 30 wireless headphones;
- a transmitter capable of receiving a signal and transmitting it to all wireless headphones.

We would like to work with **Digital Mixing Console** (*Midas M32, Behringer X32, Yamaha CL series or similar*). It is necessary to have powerful and stable Wireless router, which is commutated with the mixer and ready to work with the tablet.

1 x any wireless microphone system for choreographer’s remarks during rehearsal.

All required signal cables (XLR, Jack) and power cables.

A stage plan for this performance is provided below
